

SITE PACKS

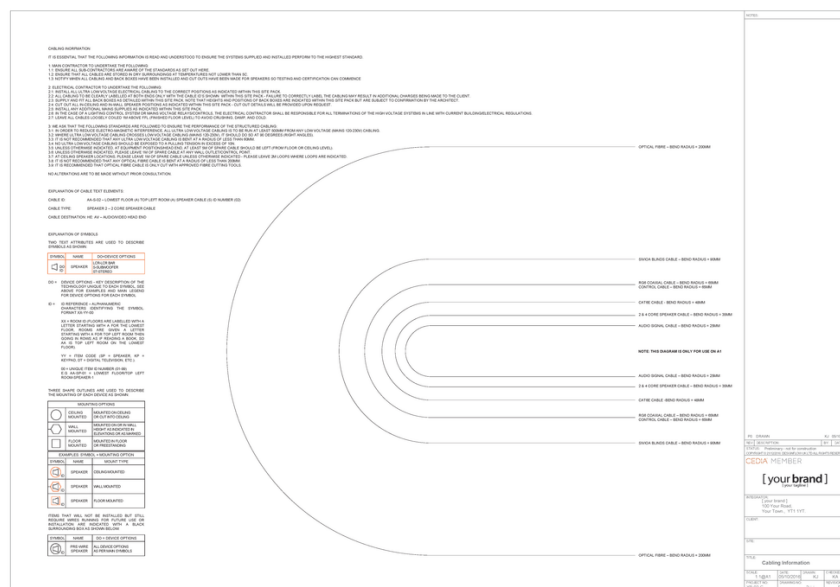

world-leading smart-building consultants

Site Packs

We can produce General Arrangement drawings, full Wiring Schedules, and Equipment Elevations for any system design, to suit your requirements. Providing systems integrators with efficient and accurate wiring plans and schedules on time to enhance your professionalism. The inclusion of equipment elevations clearly communicates exactly what is required on site. Our clear, J-standard adherent General Arrangement drawings allow you to communicate clearly with all collaborators and stakeholders on a project.

An abstract, white wireframe graphic of a human figure, possibly a woman, is positioned on the left side of the page. The figure is composed of a dense grid of lines that form the body, with some lines extending outwards to create a sense of movement or flow. The figure is oriented vertically, with its head at the top and its legs at the bottom.
